

North America

Text by The Project Ready! Team

This is North America. North America is the third largest continent. Our home is in North America.

A continent is a large piece of land. There are seven continents on our planet, Earth. Let's count them on this map.

tundra

mountains

prairie

forest

desert

ocean

There are many different biomes in North America. There are cold and snowy tundras, mountains with high peaks, flat prairies with lots of grass, forests with tall trees, hot and dry deserts, and many oceans. Unique animals and plants grow and live in each biome.

Mexico City is the largest city in North America. It is also one of the oldest cities in North America. Many people in Mexico City speak Spanish.

Many people travel to North America to see famous sites. In America, people visit New York City to see the Statue of Liberty. This statue welcomes people to the city.

The Grand Canyon is a huge, colorful valley cut through rocks. It is in the southern part of America. Adventurous people visit every year for hiking, camping, and exploring.

Interesting Facts

The largest country in North America is Canada. It covers almost half of the land in North America.

The longest river in North America is the Missouri River. It flows through seven states.

The tallest mountain in North America is called Denali. It is in Alaska.
