Vet Center – Dog/Cat Life Cycle Activity, Directions

## Dog/Cat Life Cycle

### **Dramatic Play Area: Vet's Office**

**Skills Targeted:** Oral language, noticing details in pictures, observing similarities and differences

**Materials:** Dog or Cat life cycle cards

#### **Outline of Activity:**

1. Explain that dogs look different depending on their age. A grown up dog doesn't look the same as a puppy.
2. Show the four life cycle picture cards.
3. Look at each picture carefully with the children. Talk about details in each picture. For example, point out the fact that the elderly dog has grey hair on its face. Talk about things that are similar and different in each picture.
4. Ask guiding questions to engage the children in the discussion. For example you might say, "Look at the newborn puppy. Is it small or large? What do you notice about this puppy's eyes?"
