degrees Fahrenheit: It can be as hot as 100 degrees Fahrenheit.

degrees Fahrenheit: It can be as cold as -80 degrees Fahrenheit.

Mount Everest has extreme weather. It gets really cold and really hot.

The wind can blow as fast as 200 mph.
and pika all live on the tall mountain.

Climbing Mount Everest

Text by The Project Ready Team
conquer the hazardous climb to the top. Many people visit every year attempting to conquer the highest peak on the continent of Asia. Mount Everest is the tallest mountain in the world. It is on the border of Nepal and Tibet.
There are no stores on Mount Everest to buy home for a long time. Therefore, climbers must bring a lot of supplies on their journey. It takes about 40 days to climb the mountain, so they will be away from their small tent, cooking utensils, and warm clothes for an extended period. Climbers need sturdy boots, and dried food is essential for energy.
the weather to be safe to climb. They also must wait for
their bodies to get used to the new climate. They cannot start their
journey right away. They must spend time at base camp to allow
climbers arrive at Mount Everest.
Climbers chart their course before they begin. Climbers chart their course before they begin. The top of Mount Everest. Climbers chart their course before they begin. There are 18 possible paths to the summit. They must climb slowly and carefully. The wind, cold, and snow mean many challenges. Climbers face many challenges.
mountain, covering everything in its path. An avalanche happens when snow tumbles down the mountain before they reach the top. An avalanche journey and go back down the mountain. Abandon their journey and could mean climbers have to abandon their journey. Avalanches are perilous and climbers are constantly alert for danger. As they ascend the mountain, climbers are constantly alert for danger.
Safety equipment is very important on Mount Everest. Climbers need ropes and helmets to protect their bodies as they climb over slippery, ice-covered ground.
tanks to help them breathe. Climbers carry oxygen in oxygen levels are low on Mount Everest. We breathe it in. The Our bodies need oxygen to stay healthy.
Successful Climbs

Mount Everest has been successfully climbed more than 10,000 times.

- On May 29, 1953 a visitor from New Zealand named Edmund Hillary climbed Mount Everest with the help of Sherpa Tenzing Norgay. They were the first people to climb all the way to the top.

- The youngest person to climb Mount Everest was a thirteen year old from the United States of America named Jordan Romero.

- The oldest person to climb Mount Everest was Yuichiro Miura who was 80 years old.

- Kami Rita Sherpa from Nepal has climbed Mount Everest more than any other person. He has climbed the mountain more than 25 times.
