North America

Text by The Project Ready Team
This is North America. North America is the third largest continent. Our home is in North America.
A continent is a large piece of land. There are seven continents on our planet, Earth. Let's count them on this map.
There are three big countries in North America. They are Canada, Mexico, and the United States of America.
Our country is called the United States of America. Sometimes we call it USA.
In neighborhoods, people in North America live in lots of different places. They live in big cities, on farms, out in the country, and in small towns.
Speak Spanish.

Mexico City is the largest city in North America. It is also one of the oldest cities in North America. Many people in Mexico City.
Statue welcomes people to the city. USA. People visit New York City to see the Statue of Liberty. Many people travel to North America to see famous sites. In The
Adventurous people visit every year for hiking, camping, and exploring.

The Grand Canyon is a huge, colorful valley cut through rocks.
There are many different habitats in North America. Unique animals and plants grow and live in each habitat. Let's name the habitats:

- Ocean
- Desert
- Forest
- Prairie
- Mountains
- Tundra
What animals live in the tundra?

There are cold, snowy places called tundra.
Polar bears and snowy owls live in the tundra.
What animals live in the mountains?

There are tall mountains with high peaks.
Bobcats and big horn sheep live in the mountains.
What animals live in the prairie?
There are flat prairies with tall grass.
Bison and prairie dogs live in the prairie.
What animals live in the forest?

There are dense forests with towering trees.
Frogs and salamanders live near ponds in the forest.
What animals live in the desert?

There are not dry deserts that get very little rain.
Rattlesnakes and scorpions live in the desert.
What animals live in the ocean?

There are vast oceans full of deep water.
Dolphins and sea stars live in the ocean.
The largest country in North America is Canada. It covers almost half of the land in North America.

The longest river in North America is the Missouri River. It flows through seven states.

The tallest mountain in North America is called Denali. It is in Alaska.
