Interesting Facts .....	23

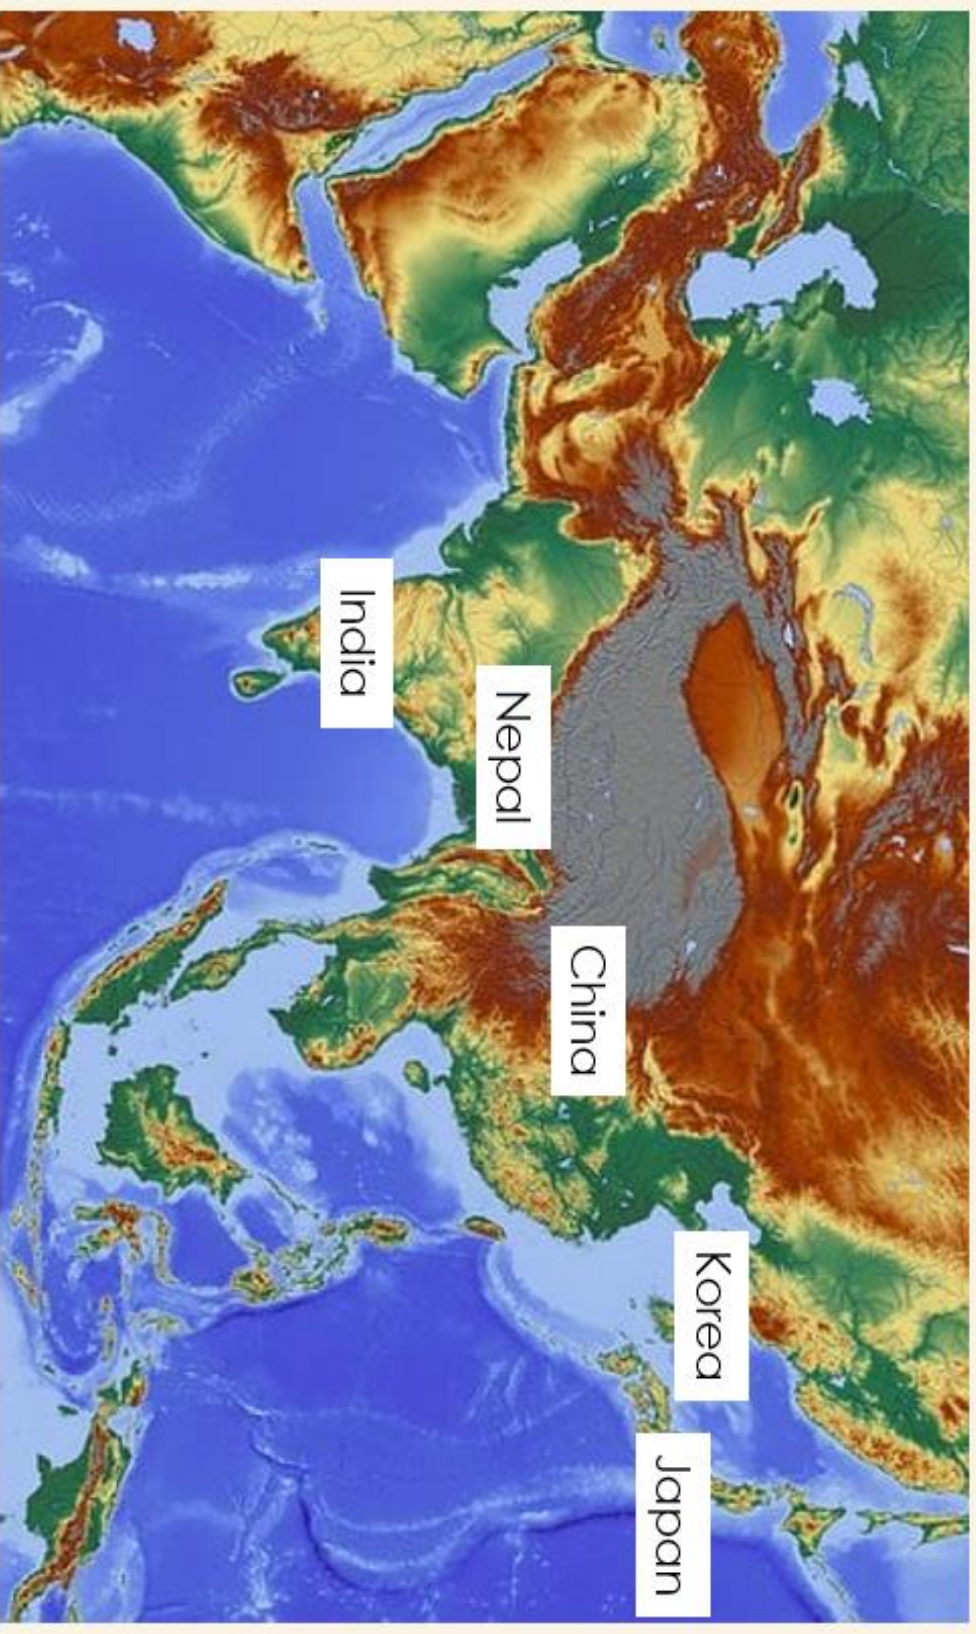

This is Asia. Asia is the largest continent.

A continent is a large piece of land. There are seven continents on our planet, Earth. Let's count them on this map.

There are big countries in Asia, like India and China. There are also small countries, like Japan, Korea, and Nepal.

People in Asia live in lots of different places. They live in big cities, on farms out in the country, in small towns, and in neighborhoods.

Tokyo is the largest city in Asia. It is in the country of Japan. More than 38 million people live in Tokyo.

Many people travel to Asia to see famous sites. More than six million people visit India to see the Taj Mahal every year. This beautiful monument was built over 350 years ago. It is so big and intricate that it took more than 22,000 people to build!

The tallest mountain in the world is in Asia. It is called Mount Everest. Adventurous people attempt to climb to the very top of the mountain. Do you think you would be brave enough to try?

tundra

mountains

prairie

rainforest

desert

ocean

There are many different habitats in Asia. Unique animals and plants grow and live in each habitat. Let's name the habitats.

There are cold, snowy places called tundra.  
What animals live in the tundra?

Siberian chipmunks and Siberian tigers live in the tundra.

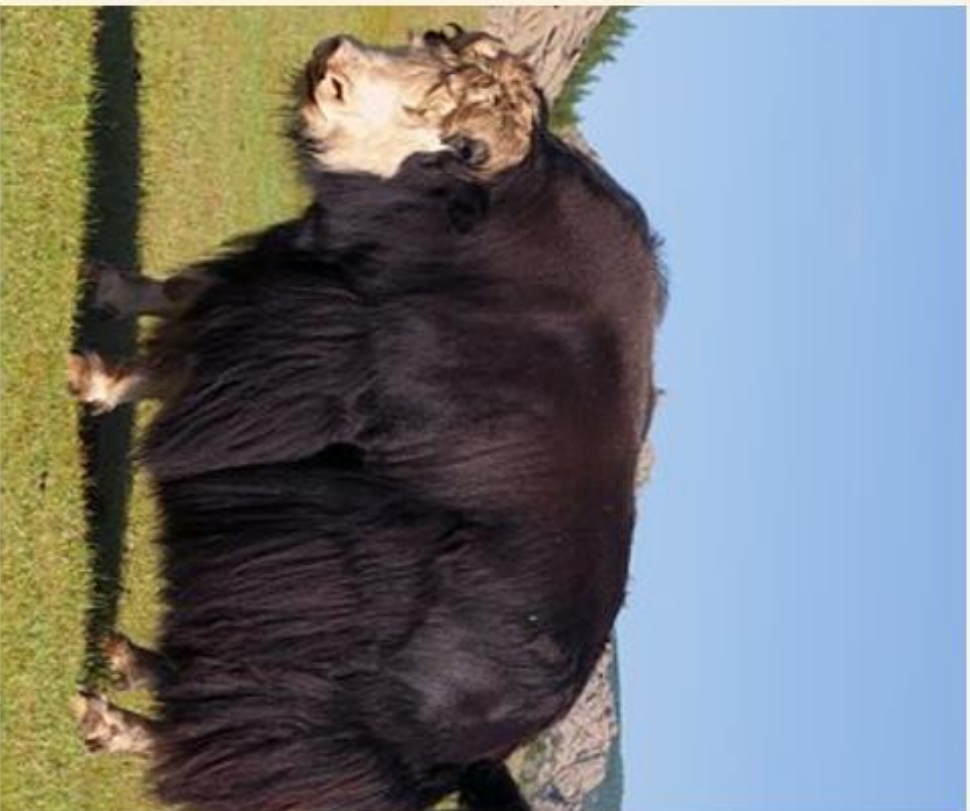

There are tall mountains with high peaks.  
What animals live in the mountains?

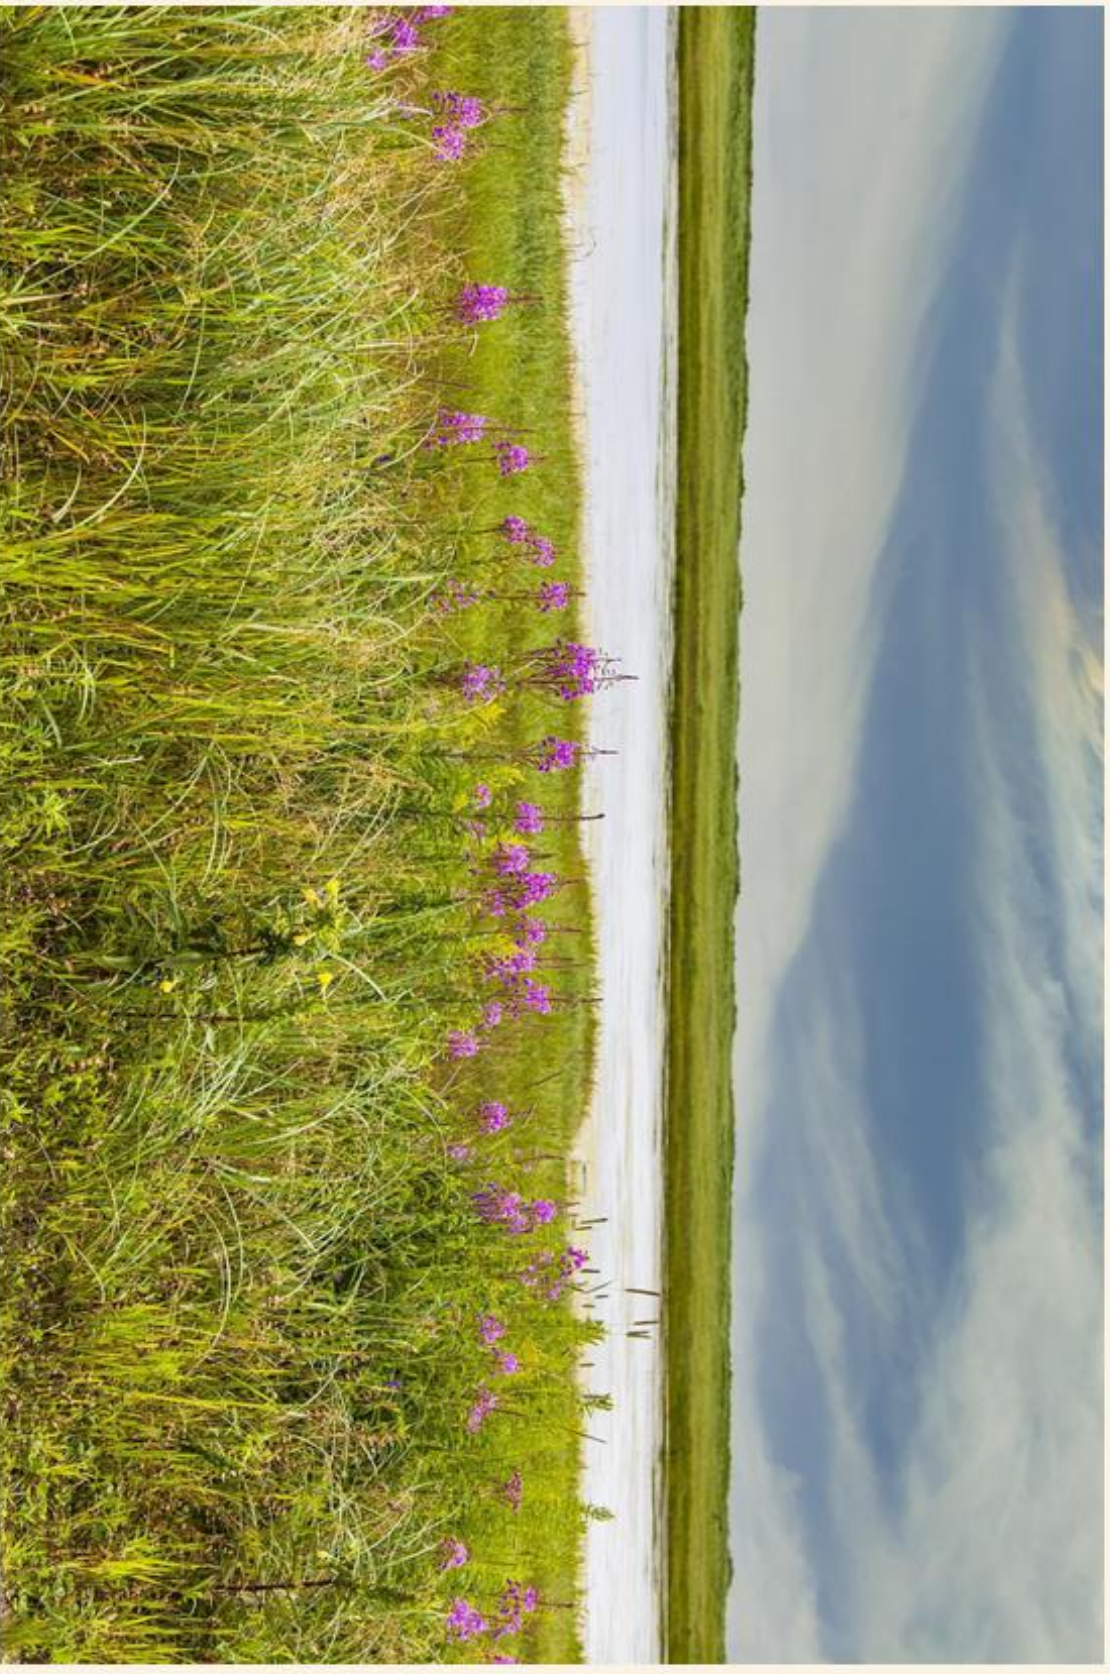

There are tall mountains with high peaks.  
What animals live in the mountains?

Yaks and pika live in the mountains.

There are flat prairies with tall grass.  
What animals live in the prairie?

Przewalski horses and goitered gazelles live in the prairie.

There are humid rainforests with soaring trees.  
What animals live in the forest?

Orangutans and elephants live in the rainforest.

There are hot, dry deserts that get very little rain.  
What animals live in the desert?

Camels and gerbils live in the desert.

There are vast oceans full of deep water.  
What animals live in the ocean?

Dolphins and snake eels live in the ocean.

# Interesting Facts

Many people live in Asia. More than 5 billion people live there! That is more than half the people on Earth.

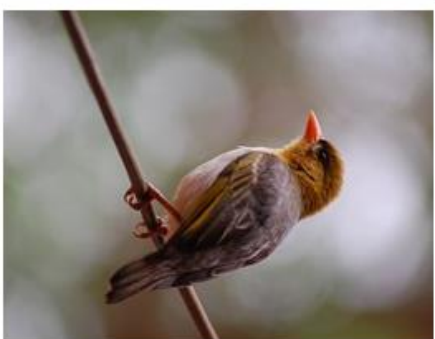

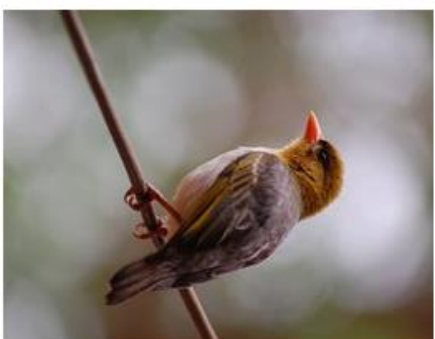

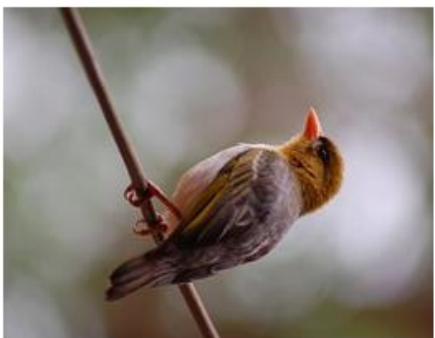

There are 2,300 languages spoken in Asia.

The busiest intersection in the world is in Tokyo. Thousands of people cross the roads at the same time.

PROJECT  
READY  
MOUNT ST. JOSEPH UNIVERSITY

On the continent of Asia, in between the country of Nepal and an area of China known as Tibet, sits one of the world's most incredible natural wonders. Do you know what it is?

It is the tallest mountain in the world. Mount Everest!

Mount Everest is more than 29,000 feet tall. That is enormous! It is the tallest mountain in the world. Incredibly, Mount Everest grows taller every year.

Mount Everest is special to the people who live there. The Tibetan people call Mount Everest "Holy Mother." The people of Nepal call the mountain "goddess of the sky." Many visitors bring prayer flags to leave behind on the mountain. This is a Tibetan tradition that is believed to bless the land around the mountain.

Mount Everest has extreme weather. It gets really cold and really hot.

It can be as cold as -80 degrees Fahrenheit.

It can be as hot as 100 degrees Fahrenheit.

The wind can blow as fast as 200 mph.

The weather makes it safe to climb only in May or November.

jumping spider

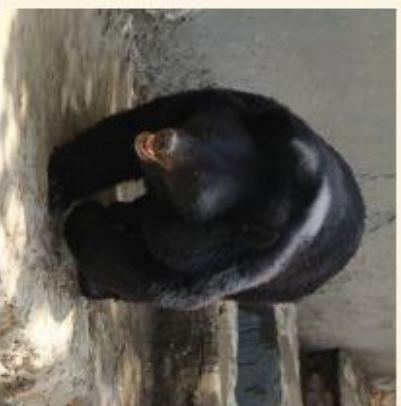

bar-headed goose

yak

Himalayan tahr

Himalayan black bear

pika

Many interesting animals live on Mount Everest. Jumping spiders, bar-headed geese, yaks, Himalayan tahr, Himalayan black bear, and pika all live on the tall mountain.

# Climbing Mount Everest

Text by The Project Ready Team

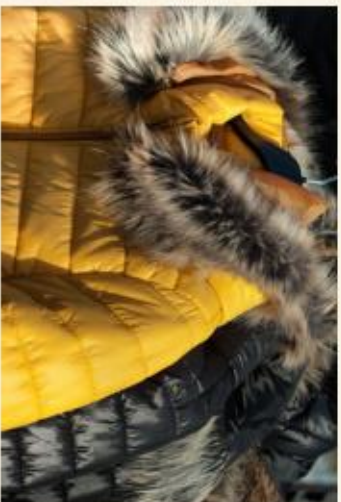

Mount Everest is the tallest mountain in the world. It is on the continent of Asia. Many people visit every year attempting to conquer the hazardous climb to the top.

dried food

warm clothes

sturdy boots

small tent

cooking utensils

climbing ropes

Climbers have to bring a lot of supplies on their journey. It takes about 40 days to climb the mountain so they will be away from their home for a long time. There are no stores on Mount Everest to buy extra supplies.

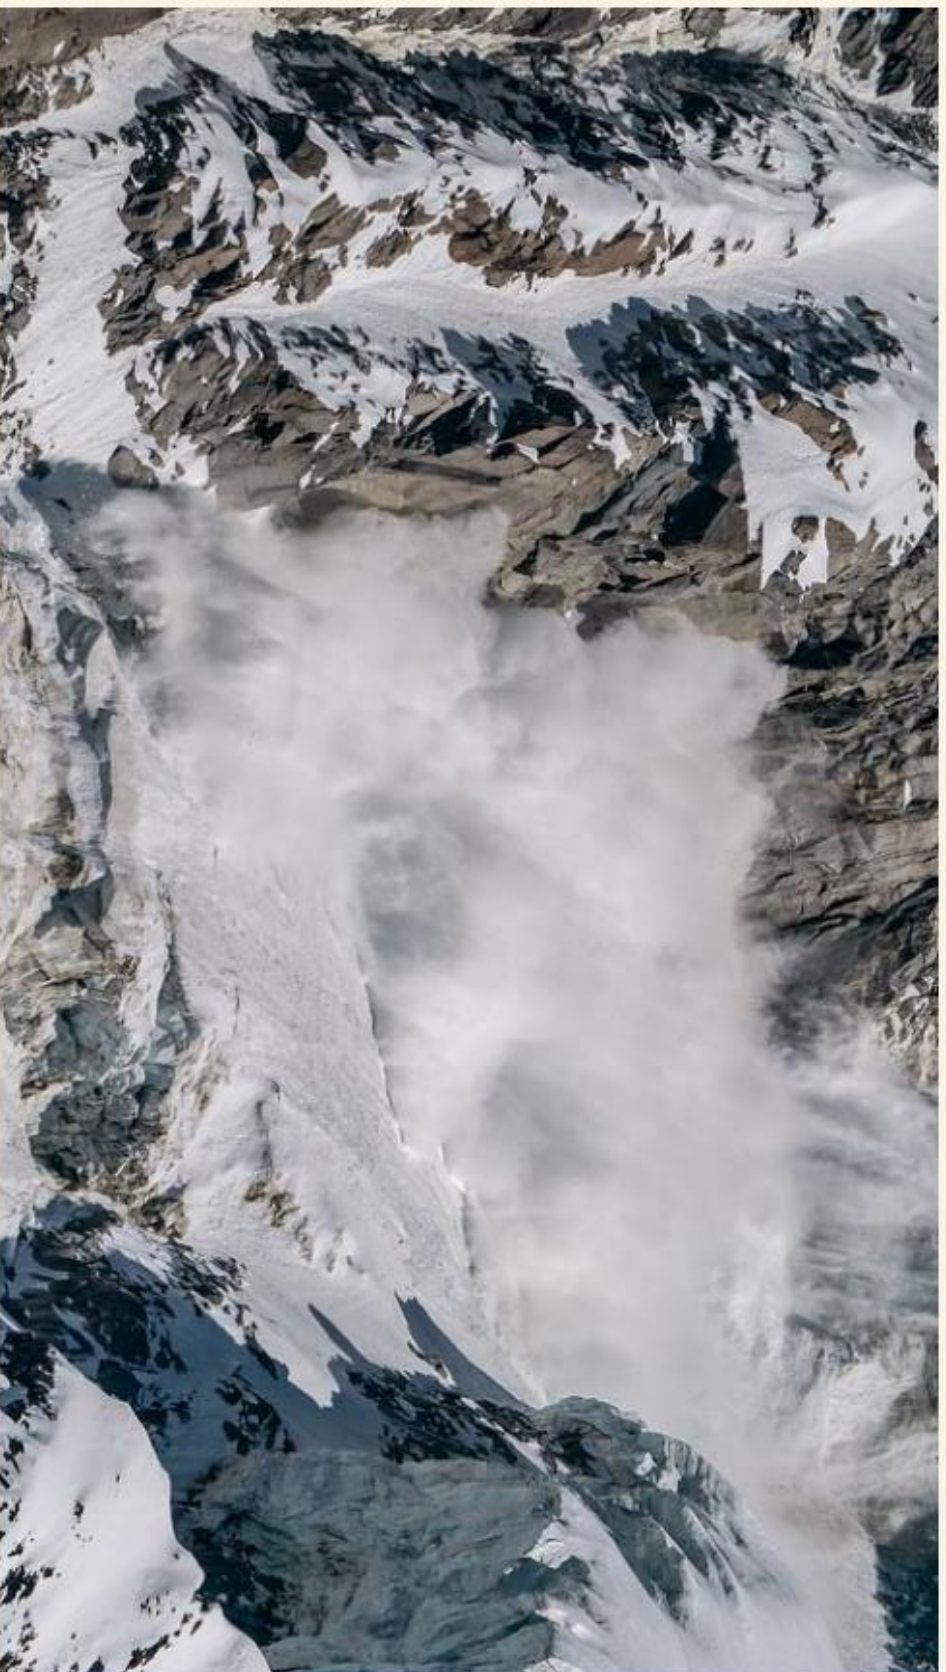

When climbers arrive at Mount Everest, they cannot start their journey right away. They must spend time at base camp to allow their bodies to get used to the new climate. They also must wait for the weather to be safe to climb.

As they **ascend** the mountain, climbers are constantly alert for danger. Avalanches are perilous and could mean climbers have to abandon their journey and go back down the mountain before they reach the top. An avalanche happens when snow tumbles down the mountain, covering everything in its path.

Safety equipment is very important on Mount Everest. Climbers need ropes and helmets to protect their bodies as they climb over slippery, ice-covered ground.

Our bodies need oxygen to stay healthy. We breathe it in. The oxygen levels are low on Mount Everest. Climbers carry oxygen in tanks to help them breathe.

# Successful Climbs

Mount Everest has been successfully climbed more than 10.000 times.

- On May 29. 1953 a visitor from New Zealand named Edmund Hillary climbed Mount Everest with the help of Sherpa Tenzing Norgay. They were the first people to climb all the way to the top.
- The youngest person to climb Mount Everest was a thirteen year old from the United States of America named Jordan Romero.
- The oldest person to climb Mount Everest was Yuichiro Miura who was 80 years old.
- Kami Rita Sherpa from Nepal has climbed Mount Everest more than any other person. He has climbed the mountain more than 25 times.
